

Introducing Inherently Dissipative Cleanroom Cases

Cleanroom cases are light blue in color

Vastly Improved Design with Cleanroom Approved ESD Protection

CCI continues to push the ESD packaging envelope with yet another introduction to the market. CCI now stocks a cleanroom version of the new injection molded cases. If you are tired of the chalking and FOD created from carbon loaded products, this product is for you. These inherently dissipative cases will change the game.

These new cases are now available for use as an empty case. Along with that, these new cases can be used for Tacki Pak, Grid Pak, and Pillow Paks, as well as available with vacuum formed inserts. We have two options available off the shelf, and many other sizes and options available upon request.

Cleanable to level 10 cleanroom compliance

Part Number	Dimensions	Minimum Order Quantity
2020 IDP	2.0 X 2.0 X .25"	500
2525 IDP *	2.56 X 2.56 X .50"	150
2820 IDP	2.875 x 2.0 x .50"	500
2535 IDP *	3.5 X 2.56 X .50"	100
2535-75 IDP	3.5 x 2.56 x .75"	500
2535-100 IDP	3.5 x 2.56 x 1"	500
3545 IDP	4.56 X 3.5 X .50"	500

* Stocked and in inventory

- Other part numbers available by request
