

Corstat-Korrvu Combines Retention & Cushioning of Sensitive Devices

Excellent custom option for shipping a “high-mix” of static sensitive devices

Conductive Containers, Inc. has designed a new custom option for consumers looking for a versatile cushioning and retaining product. Introducing Corstat-Korrvu. This design provides the consumer with great static shielding protection with a static dissipative retention film design.

This innovative design accommodates a variety of devices within a size range - making it very versatile for your needs. The Corstat-Korrvu contains no charge generators, making it suitable for both the shipping and handling needs of a high mix of static sensitive devices.

Is this how your valuable product should be packaged? What is the true cost of this packaging?

Kraft box - not static safe, not work station compatible.

Static shield bag adds labor costs to load and seal each bag.

Pink bubble wrap adds labor to load products. How much bubble wrap is necessary?
