

Plastic Grid Trays - Keep Your Parts Safe

A truly universal line of products to keep your boards organized and protected.

CCI's new board handling "Plastic Grid Trays" allow users to place multiple sizes and shapes of boards in one easy-to-use ESD safe product. The Plastic Grid Trays make softer contact with boards compared to injection molded products, and is best suited for small to medium sized boards. These trays can be made in either permanently dissipative or permanently conductive plastic.

- Boards can be placed on X or Y axis.
- Trays can hold irregularly shaped boards, even round or curved boards.
- PGTs can be fitted into Durastat Trays for robust handling applications.
- No tooling is required.
- Permanent static dissipative surface.
- Cost savings versus injection molded racks.
- Ideal for memory boards and LED boards.
- 0.07" spacing between 0.25" tall rows.

CCI Stock Part Number	L x W x H	Description
PGT-0806	8.2 x 5.65 x .375	Dissipative Grid Tray with CFP Bottom
PGT-1806	18 x 5.65 x .375	Dissipative Grid Tray with CFP Bottom
