

CCI's Newest Super Adjustable Series of Totes

New Material Handling Design Creates 100 new Cell Sizes

As the circuit board industry has evolved, circuit boards have decreased in size. Due to this trend, companies are requiring the same versatility we've always provided, only in smaller packages. Companies are now looking to accommodate different sized boards in one adjustable package. CCI has created a new line of "Super Adjustable" In-Plant Handlers for the changing market. Now you can create multiple cell sizes to fit the changing demands of your circuit boards.

- Available as a stock product.
- Adjustable to accommodate multiple cell sizes.
- Can be made from Corstat or Conductive Fluted Plastic.
- Dual height partitions for easy removal of parts.
- Space to add 1/4" foam pad to top or bottom of tote.
- All totes have a usable footprint of 16-5/8" x 9-3/4".
- Available heights are: 2-3/4", 3-3/4", 5-5/8" & 7-1/2".

CFP options are readily available.
