# MEDICAL INDUSTRY

**Packaging & Handling Solutions by Conductive Containers, Inc.**

At Conductive Containers, Inc. we are known for our manufacturing and expertise in ESD safe electronics material handling and packaging. For medical environments, we manufacture both ESD safe and non-ESD safe solutions that fit perfectly in applications that require clean and reusable material handling.

## FLUTED PLASTIC (NON-ESD)

CCI fabricates fluted plastic for clean medical applications to aid in organizing and streamlining material handling. We fit your system!

## CONDUCTIVE FLUTED PLASTIC

Conductive fluted plastic (CFP) designs for ESD safety when handling electronic parts. CCI's popular, light-weight Durastat tote system can be built in any size to fit specific requirements.

## TRAYS & CLAMSHELLS

Our thermoforming capabilities can provide trays and clamshells designed to protect parts in packaging and handling from physical and electrical damage. We will custom design a solution!

## KLEANSTAT FLEX

Kleanstat Flex is a new, state-of-the-art, permanent ESD material designed to prevent static buildup and prevent foreign object debris (FOD) from contaminating devices while providing excellent cushioning!
