

PARTICULATE CLEANING

FOR THERMOFORMED PARTS

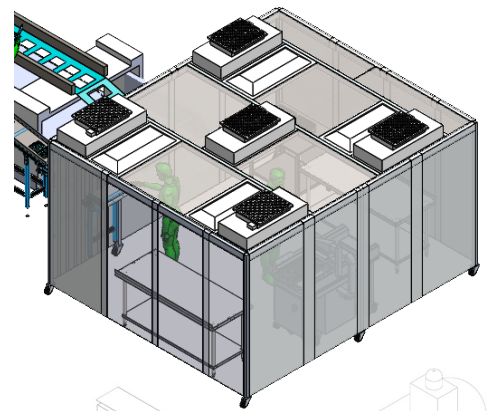

ENHANCE YOUR PRODUCT WITH CCI'S ADVANCED CLEANING PROCESS

Are you looking for a reliable partner to produce the clean thermoformed parts? Look no further than Conductive Containers, Inc. (CCI). Our meticulous cleaning process is designed to optimize the quality and reliability of your components, providing you with peace of mind and operational efficiency.

OUR PROCESS

Our comprehensive cleaning process is validated to IEST-STD-CC1246E Level 300 and includes:

- ✓ **Thermoforming Excellence:** We start by thermoforming parts with precision and expertise, meeting your exact specifications for performance and functionality.
- ✓ **Inspection and Precleaning:** Each part undergoes rigorous inspection and precleaning to remove initial contaminants and prepare for thorough cleaning.
- ✓ **Advanced Particulate Trap Filtration:** Parts are processed through our state-of-the-art particulate trap system, in our ISO Class 7 Cleanroom, effectively removing microscopic particles and debris.
- ✓ **Secure Packaging:**
 - Cleaned parts are carefully bagged to prevent contamination during transit or storage, ensuring they arrive in pristine condition.
 - Each bag is securely sealed to maintain cleanliness and protect parts during handling and transportation.
 - Cleaned and sealed parts are expertly boxed and labeled for shipment, ready to streamline your receiving process.

WHY CHOOSE CCI?

- **Quality Assurance:** We are committed to delivering cleaned parts that meet or exceed your cleanliness standards.
- **Efficiency:** Our streamlined process ensures prompt delivery of cleaned parts, optimizing your supply chain.
- **Reliability:** With CCI, you can trust that your components will arrive ready for immediate use without additional cleaning or inspection.

Let Us Elevate Your Product Quality!
